# AI intra-relationships

# Why AI now?

01

**BIG DATA**

02

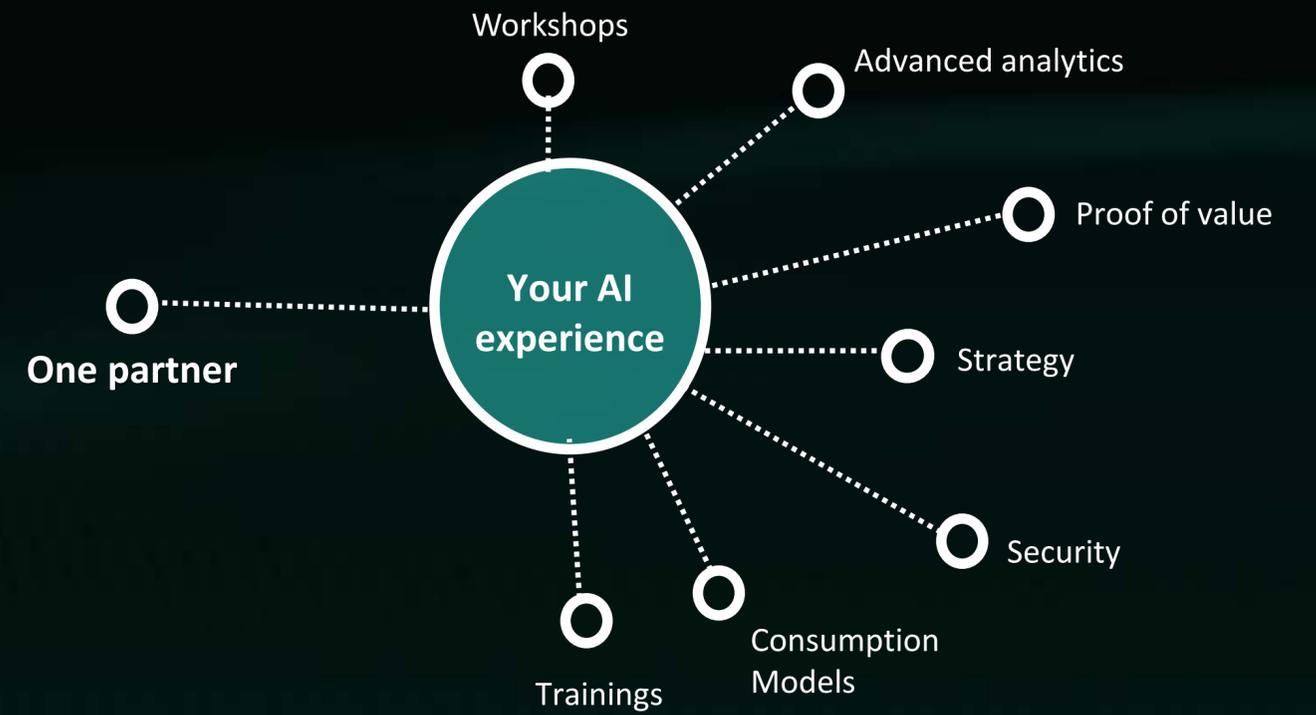

**BETTER ALGORITHM**

03

**PARALLEL COMPUTATION**

# Need to approach AI in simple steps

## Explore

Align teams round common vision and plan

Understand outcomes and challenges

Explore the best use cases and technologies

## Experiment

Gather, and validate your use cases and data

Conduct a Proof-of-Value for select Use Cases

Integrate AI to the existing applications

## Evolve

Manage Change, train your teams and AI systems

Optimize your AI technology

Implement more use cases

# HPE 'makes AI work' from the edge to cloud to core

## AI for IT

- **HPE InfoSight** – monitors 24/7; predicts problems, proactively resolves problems
- **HPE Aruba IntroSpect** – detects attacks at the edge

**Improve productivity** by transforming AI infrastructure management and support with embedded AI

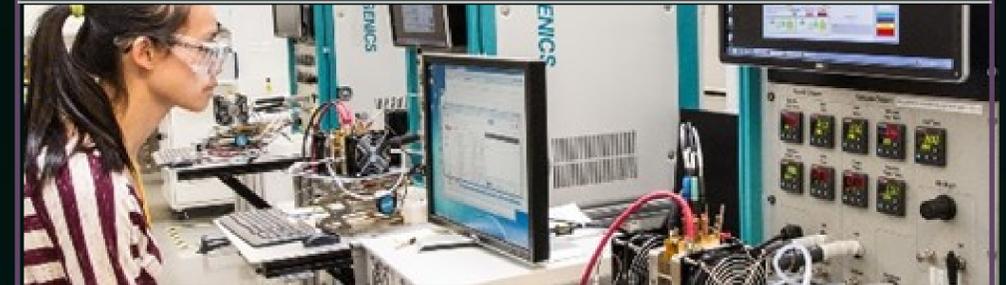

## AI for business

- **Expertise from HPE Pointnext** advisory, professional, operational, consumption services
- **Purpose-built AI portfolio** (compute, storage, networking)
- **Integrated / proven AI solutions**
- **Strategic planning and technology** leveraging partner ecosystem
- **Faster problem solving** using HPE IP – HPE Deep Learning Cookbook

**Gain faster insights** from data with integrated and scalable AI solutions

## AI for the future

- **Optimize AI infrastructure** with the latest technologies developed by Hewlett Packard Labs
- Examples include
  - Dot product engine (DPE) – a hardware accelerator for vector-matrix multiplication (VMM)
  - Memory-Driven Computing

**Boost performance** leveraging the latest technologies designed by HPE and partners

**Technology**

**Let's accelerate your transformation**

**People**

**Economics**
