

STFC in Conversation Net Zero

STFC in Conversation Net Zero

Dear Colleagues

You are invited to join STFC and the Community in a conversation around our future Net Zero priorities. Whether your field is astronomy, solar and planetary science, particle physics, particle astrophysics, nuclear physics, accelerator science or computational science – this event is for you.

Full details, including how to register, can be found [here](#)

When: Thursday 24 November, 09:30 – 16:00 (registration from 09:15)

Where: STFC Daresbury Laboratory

- Invited speakers will help to shape the conversation by offering fascinating insight from real world case studies, which are driving Net Zero.
- Following this, time will be available for you and your colleagues to consider Net Zero in the context of your own research and project groups.
- There will also be plenty of time for informal networking over refreshments and lunch.

Please feel free to share this invitation with colleagues in your networks who you think will be interested in joining us.

Numbers are limited by venue capacity so please **RSVP by 9 November, 2022**

If you have any questions, please don't hesitate to contact us at stakeholders@stfc.ukri.org

We look forward to seeing you.

With best wishes,

Valerie Farr
